9	Enclosures	1. Report 2. Photos		

A BRIEF DESCRIPTION OF THE EVENT:

Department of ECE in association with NSS Unit of Narayana Engineering College, Nellore organized awareness program on Smart phone impact on children social & environmental development at Z.P high school. During the program Dr.K.Murali head of ECE department stated that, Over 1.8 billion people own smart phones and use their devices on a daily basis. Some studies estimate that an average person checks their screen 150 times a day. This widespread use of technology trickles down to the youngest members of our society. Data from Britain shows almost 70 percent of “11- to 12-year-olds use a mobile phone and these increases to close to 90 percent by the age of 14.” About 6 staff members and 25 students have actively participated in the Smart phone impact on children social & environmental development at Z.P high school.
