The Department of EEE has conducted the event **PPT on Technical Topic** at **01:30 P.M** to **05:00 P.M** on **10-10-2022** under the Students Association SAKALA. Students from II & III Year B.Tech are actively participated in this event and made this event a grand success. Prizes were distributed to the winner's team.

Presentation skills are one of the essential skill sets for students in institutions of higher learning. To help them improve their presentation skills, students are encouraged to use systematic methods to facilitate their presentations in the classroom. The main purpose of emphasizing presentation skills in higher education is to help develop professionalism in the learning environment. In this era of technological advancement, students can enhance their presentation skills using high-tech equipment, thus improving their ability to present information in a professional manner.

Students find presenting in or outside the classroom during their studies very challenging. Many feel less confident when speaking in front of large groups. Presentations can be stressful and many students do not enjoy them and feel nervous when asked to present.

To overcome these challenges, students need to be prepared. The following are four key elements to improving presentation skills among students.

1. English proficiency level
2. Create innovative ideas
3. Body language
4. Be well organized

One must be well organized in order to make the audience understand the purpose of the talk and keep them engaged from the beginning to the end of the presentation. Learning to put together a simple and well-organized presentation will give students confidence and help them be more successful in the future. Therefore, students must realize the importance of presentation skills before stepping into a full-time job.
