EYE CAMP

God has blessed us with five senses, It is said that eyes are the windows to the soul and it is absolutely correct. Without our eyes, we are forced to live a very miserable life. Our eyes help us to see the beauty of the nature. But, these days we come across a lot of people who are suffering from eye disorders such as cataracts, poor vision, glaucoma night blindness, etc. when we talk about a highly populated country like India, the number is in millions living predominantly in rural India. Low level of education and income earning in rural areas are two of the biggest reasons for this.

Narayana Engineering College, Nellore organized an Eye Camp in association with Narayana Medical College & Hospital, Nellore on 06-02-2015 at Kovuru Mandal, Nellore. Doctors have brought well-equipped eye examination equipment to examine the patients effectively. They spoke to villagers regarding eye healthcare services. Ophthalmologists from the Hospital examined the patients, gave them medicines and eye drops and enlightened them on the precautions to be taken to protect their eye sight. 65 students and 8 staff members have actively participated in the event.

AWARENESS RALLY ON WORLD HEALTH DAY

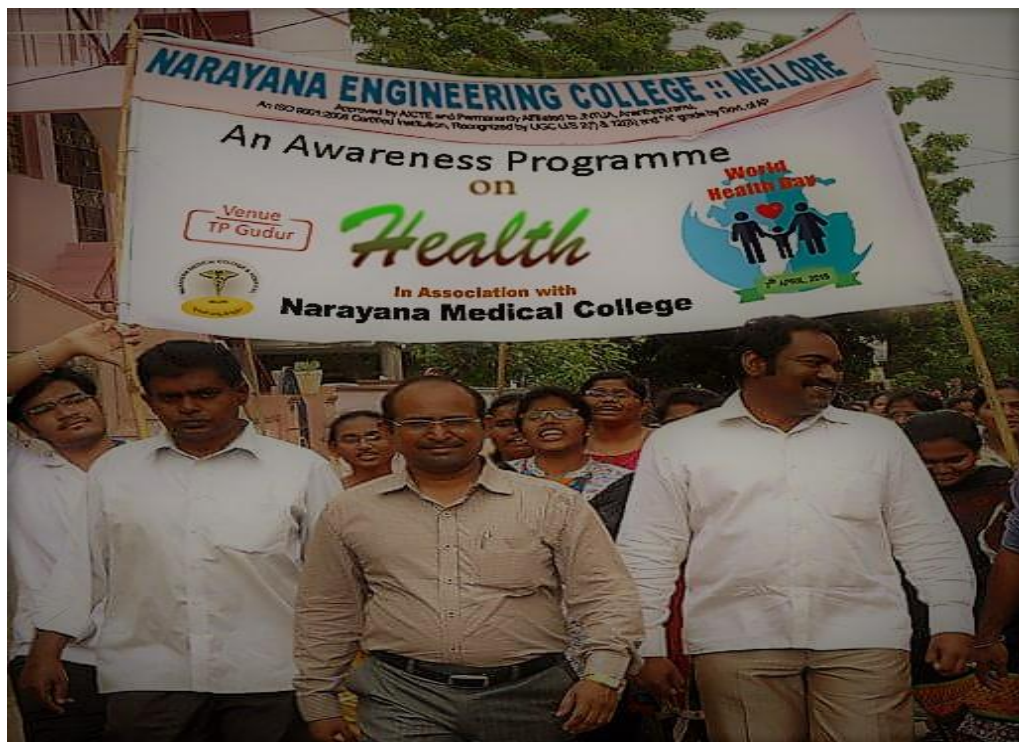

World Health Day is celebrated in almost every places throughout the world on the 7th of April every year. This day has especially been dedicated to spread awareness about the importance of good health in our lives. Its importance is emphasized by way of various activities undertaken on this day.

Narayana Engineering College, Nellore organized an Awareness Rally on World Health Day in association with Narayana Medical College & Hospital, Nellore on 07-04-2015. The rally was organized from our college to Haranadhapuram center, Nellore. The aim of involving the students in this rally is to make the future generations realize the importance of health and the ways and means to lead a healthy life because People these days are so engrossed in their work that health has taken a back seat in their priority of things. World Health Day is celebrated to highlight the importance of making our health our priority. We would be able to handle other aspects of our life efficiently only when we are healthy. 7 staff members and 69 students have participated in the rally.

E-LEARNING IN ZP SCHOOL

Although our college is located in the centre of the city, around our college premises there are Municipal and Zilla Praja Parishad schools. They are deprived of knowledge in digital education, use of ICT tools and the availability of e-resources because of lack of trained computer teacher and limited numbers of lab equipment.

To enhance their skills and knowledge in the curriculum subjects apart from text book learning, as one of the most reputed educational institutions in Nellore, our Narayana Engineering College, Dept of MCA, visited DCR Zilla Praja Parishad High School, Nellore on 23-9-14 and organized a one day program on "E-Learning".

The objective of conducting this program is to promote ICT enabled learning with the help of digital tools and to help students in project based learning, analytical and skill based learning in all school subjects and concepts in science, social studies, Maths, English etc, This is explained practically to the school students by the faculty and students.

Faculty members explained about importance of the e-learning to students which will bring awareness in the students about making use of online resources. They also explained that the entire world is being turned into paperless today. As the demo is given to X class students, they participated in the program very interestingly and also had hands-on-experience with few websites like YouTube, www.brightstrom.com and www.buzzmath.com etc. 67 students and 5 staff members have participated in the event.

AWARENESS PROGRAMME ON GULLY PLUGS

Our college management noticed from the words of our students that in some of the nearby villages, there is water scarcity for both drinking and cultivation. The villagers have poor knowledge of modern techniques in storing and utilizing rain water.

Therefore, in view of aforementioned facts, our objective is to train them on how to preserve rain water in gullies. Our young civil engineers of Department of Civil Engineering, planned to visit and conduct an awareness program to the villagers and farmers on the importance and need of GULLY PLUGS on 22nd March, 2015 in association with SRISHTI in Jaladanki.

A GULLY PLUG is a small temporary dam constructed across a swale, drainage ditch. This can be used for plant irrigation. A gully plug is also known as check dam.

Faculty members have given suggestions on use of GULLY PLUGS in their areas. Faculty and students advised the people to store water in aquifers or catchment areas, from which it can be drawn during the dry season for irrigation, livestock watering, and even drinking water supply. Water consumption helps in increasing underground water levels substantially. They suggested the villagers to build Gully Plugs by using local stones, clay and bushes across small gullies and streams running down the hill slopes carrying drainage to tiny catchments during rainy season.

. 55 students and 4 staff members have participated in the event.
