6	<b>Participation</b>	Staff	Students	Total
		3	30	33
7	<b>Enclosures</b>	1. Report 2. Photos		

On 10/10/2016, the Civil Engineering Department of Narayana Engineering College has visited a Residential Building under construction in Vanam thopu, Nellore, to observe Slab Work. Mr. Sreedhar the site engineer has given some steps and guidance necessarily to be taken at the time of slab work in the construction of a residential building.

This field trip helped Civil Engineering students to update their knowledge towards the selection of materials to be used for strong slab work and reinforcement details of the slab work. Slab work plays a major role in the construction of any commercial as well as residential buildings. From these kind of field trips students can gain practical knowledge in addition to theoretical knowledge which they have learnt in their curriculum.
