**REPORT FOR BEST FROM WASTE –HOBBY CLUBS-VARNA CLUB**

Creativity, as has been said, consists largely of rearranging what we know in order to find out what we do not know. Hence, to think creatively, we must be able to look afresh at what we normally take for granted.

BEST OUT OF WASTE is one such craft which follows this environmental friendly principle and at the same time creates useful and picturesque objects out of waste products. In order to make student aware of uses of waste material, and to give them a lesson on reducing waste to save our future, a 'Best out of Waste' competition was organized in Narayana Engineering College on 31st August 2018 for students of Hobby clubs.

Little hands and imaginative minds came together in a creative burst of energy. Mind-blowing, beyond expectation, fantabulous ideas were demonstrated by students. They prepared very creative and innovative models and art items from different waste materials. They used reusable and recyclable materials like news papers, shoe boxes, bangles, ice cream stick's and much more. From these items, they created an amazing array of display items and useful everyday objects leaving everyone totally impressed. The values like preservation, recycling, conservation, reduce, reuse etc are imbibed on the young heart and minds by demonstrating this noble act of caring our environment. It helped the students to develop their fine motor skills while using different kinds of material and also encouraged them to use waste material for making decorative and useable items. It was amazing to see how scrap could be transformed into such useful and beautiful articles. The creativity and artistic streak of the student were observed.
