ISO 9001:2015 certified Institution, Approved with 'A+' Grade by NAAC

### **DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING**

#### **Report on "PPT"**

ECE department has Conducted "**PAPER PRESENTATION**" on behalf of "AKHYANA" (students association) on 19 February 2020. III B.Tech students of **ECE** participated in this paper presentation event.

Total no. of PPT's : 84

Power point has a variety of advantages for both the presenter and the listeners. To progress through a slide show, the presenter only needs to click a button; this allows the presenter to maintain eye contact with his audience and use his/her hands for emphasis. Also, the Power point presentation can be projected onto a large screen in large auditorium/lecture hall.

After the presentation, the Powerpoint slides can be distributed easily to the necessary people for future references. Unlike paperwork, a Powerpoint presentation can be stored easily on the computer and cannot be easily lost or misplaced.

Advantages of paper presentation:

1. Ease your brain
2. Better preparation
3. Show your point visually
4. Less nervous
5. Templates for different appearance
6. Easy to add images
7. The almighty hyperlink
8. Multimedia output
9. Cross-platform viewing

Finally Paper presentation plays a predominant role in this modern world, especially B.Tech students should add flavor of presentation skills to their resume as a good company look for it. In addition to studies other activities are also important-paper presentation is one among those activities and is very much required in today's world. In this competitive world we must explore every nook and corner in order to get success and better opportunities.
